Event details

Date- 1 November 2025, Saturday

Time -11 am

Venue - Civil Seminar Hall (304), NB.

Our very own distinguished alumnus Mr. Ajay Yadav and Ms. Diksha Gore summarize the key topics like career opportunities in government jobs, preparation for exams like MPSC and GATE, the importance of soft skills like team management and leadership, and specific examples of government projects.

Our objective of this interaction is to provide students with insights into government job opportunities, career paths, and the required preparation for civil engineers. The event is not just a lecture, it's a bridge between where we are now and we aspire to be. Hearing from someone who once sat in these very seats and has since navigated the professional world provides invaluable real world perspective and inspiration that textbooks simply cannot match.

Both the guest gives insightful lecture on "Opportunities to Civil Engineers in Government Sector" was truly inspiring. Their journey serves as a powerful testament to what our student can achieve. Their practical advice and real world experiences have provided invaluable perspectives that complement their academic studies.
