## **Cloud Computing Session Report**

### **Computer Engineering Department 2025-26**

---

#### **1. Title of the Session**

Cloud Computing

#### **2. Date of the Session**

28-02-2026

#### **3. Venue**

Seminar Hall

#### **4. Resource Person / Speaker**

Mr. Prashant Mahajan

#### **5. Teacher / Coordinator**

Mrs Priya M. Shelar

#### **6. Participants**

Students of Class \_\_\_\_TE\_\_

#### **7. Objectives of the Session**

- To introduce the concept of **Cloud Computing**.
- To explain the **advantages and uses of cloud technology**.
- To create awareness about **online data storage and cloud services**.
- To help students understand **modern technologies used in industries**.

---

#### **8. Description of the Session**

The Computer Science Department organized a session on **Cloud Computing** for students. The session began with a brief introduction to the concept of cloud computing and its importance in modern technology.

The resource person explained how cloud computing allows users to **store, manage, and access data through the internet instead of local computers**. Various types of cloud services such as **public cloud, private cloud, and hybrid cloud** were discussed.

The speaker also demonstrated popular cloud platforms like **Google Drive, Microsoft OneDrive, and Dropbox**, explaining how they help in **data storage, sharing, and collaboration**.

Students actively participated in the session and learned how cloud technology is used in **education, businesses, and large organizations**.

---

## 9. Learning Outcomes

- Students understood the **basic concept of cloud computing**.
  - Students learned about **different cloud storage services**.
  - Students gained knowledge about **advantages such as data accessibility and backup**.
  - Students became aware of **modern technological trends**.
- 

## 10. Student Feedback

Students found the session **informative and interesting**. They appreciated the practical examples and demonstrations provided during the session.

---

## 11. Conclusion

The session on **Cloud Computing** was successful in enhancing students' understanding of modern digital technologies. It helped students realize the importance of cloud technology in today's digital world.
