In the BOS meeting following points were discussed:

1. Welcomed all BoS members and introduced the new BoS members for A. Y. 2025–26.
2. Internship assessment and implementation should be rigorous, and in-house outcome-based projects may also be considered as internships.
3. Software Project Management course outcomes (COs) require revision to improve clarity and alignment with industry practices.
4. Research Methodology course should include review processes, plagiarism tools, and ethical usage of AI, with clearly defined course outcomes.
5. Machine Learning should be defined as a prerequisite for the Deep Learning course to ensure better conceptual understanding.
6. The number of practical assignments for Elective Courses IV and V should be reviewed and optimized.
7. Recommended that Project Stage–I be conducted in Semester VII with a separate allocation of credits, and Project Stage–II be carried out in Semester VIII with independent credit allocation.
8. The use of AI tools in student projects should be encouraged and formally incorporated.
9. Students should report and spend time at the institute on a fortnightly basis for effective project monitoring and progress.
10. Recommended that the internship be scheduled in Semester VIII to ensure better alignment with industry exposure and the execution of project work.
11. An Equivalence Committee should be formed at the Academic Council level for mapping courses across patterns (2023, 2024, 2025).
12. Changes in curriculum patterns every year should be avoided; stability in academic structure is recommended.
13. Programme courses should be properly mapped with the academic year in the ERP system.
14. Credit balance, particularly for courses like Public Speaking and Aptitude, needs to be verified and rationalized.
15. Globally recognized and standardized course nomenclature should be adopted.
16. Theory and Practical components should be treated as separate subjects with distinct subject codes, credit distribution, teaching schemes, and marking schemes.
