**In the BOS meeting following points were discussed: -**

1. At every entry and exit point (yearly) one bridge course can be added. It will help students in changing the institute.
2. Probability and statistics subject is more suitable in the fourth semester.
3. Be specific about proposed full stack development subject.
4. There should be proper correlation between electives offered in respective semesters.
5. Honor courses should explore in trending areas and it should offer only to bright students.
6. Computer workshop must include
  - a. Operating System installation and configuration
  - b. Overview of computer and network hardware
  - c. Computer Peripherals connections
7. Rethink about offering MOOC courses. It's difficult to inline these course with our timetable which adds delay in result declaration.
8. While syllabus detailing, the current industry needs, and emerging technologies should be included. AICTE Model Curriculum should be Referred and compared for structure.
9. Bridge courses should be arranged for clusters of students since more diverse disciplines are eligible for M.Tech in Artificial Intelligence and Data Science.
10. Focus will be more on gaining practical hands-on experience on the latest technologies during the practical sessions.
